

I cannot imagine a legitimate reason for you, the FCC, to accept or adopt the NAB's position as stated in NAB petition 04-160. It is frankly nonsensical and an attempt to interfere with my contractual rights to obtain information and entertainment from the source that I choose. The NAB has no reason to dictate where I get my information from other than to try and harm satellite radio, which threatens their turf. I urge the FCC not to accept the NAB's specious position.
